

Homemade Hand Sanitizer

The ingredients:

1. 2/3 cup 99% rubbing alcohol (isopropyl alcohol) or ethanol.
2. 1/3 cup aloe vera gel--preferably without additives
3. 8-10 drops essential oil, optional (such as lavender, vanilla, peppermint, grapefruit)
4. Bowl and spoon.
5. Funnel.
6. Recycled liquid soap or **hand sanitizer** bottle.

Mix alcohol and aloe vera - add another spoonful of one or the other to make the solution either thinner or thicker, if you feel that is needed.

Add oil one drop at a time. After 8 drops, check fragrance. Add more if needed.
